Education

Dayananda Sagar College of Engineering

Bengaluru, India

B.E. Artificial Intelligence and Machine Learning

Experience

Bentham AI 

Dec 2025 – Feb 2026

Backend Engineering Intern: Node.js, JavaScript, Go, Docker, GCP, GitHub Actions

Remote

- Built Node.js/Puppeteer workflow automation with REST-style service boundaries, public-site API lookups, retries, state recovery, and operator-visible errors.
- Reduced manual filing time by **85%** and shipped Dockerized services through Cloud Run and GitHub Actions.
- Improved deployment velocity by **70%** by turning repeated setup and release steps into reproducible CI/CD paths.

Google Summer of Code 

May 2025 – Sept 2025

Mentee at Invesalious: Python, VTK, wxPython, NumPy, PyTorch, ONNX

Remote

- Contributed Python features inside a mature open-source desktop application with large data paths, generated artifacts, and user-facing visualization.
- Reduced processing runtime by **87%** through asynchronous and parallel execution.
- Debugged integration issues across Python, NumPy, PyTorch/ONNX-adjacent outputs, and VTK/wxPython UI code.

Open Source

[Contributions](#) 

- Contributed maintainer-reviewed patches across **Tiled**, Kuadrant/Kyverno, IOOS, CRIU, and VideoLAN, adapting fixes to existing code style, review feedback, CI behavior, and integration constraints.

Projects

Seaweed: Contest Platform | *TypeScript, React, Next.js, Go, PostgreSQL, Judge0, Firebase, Docker*

[GitHub](#) 

- Built a full-stack assessment platform with auth-gated problem pages, code editor, submissions, admin review, shortlisting, live rankings, and reproducible result records.
- Implemented Go judging APIs with Judge0, PostgreSQL rankings/materialized views, Redis-backed runtime state, and Docker/Kubernetes deployment for **500+ concurrent users**.

Postificus | *Go, Echo, Rod, PostgreSQL, Redis, RabbitMQ, Docker, Prometheus*

[GitHub](#) 

- Built browser-automation-backed product workflows with REST APIs, RabbitMQ workers, Redis autosave, PostgreSQL persistence, durable job status, and recoverable external publishing tasks.
- Added retries, DLQs, circuit-breaker isolation, health checks, and Prometheus metrics so long-running API/browser workflows stayed observable and fault-tolerant.

Swish Support System | *JavaScript, React, Python, PostgreSQL/pgvector, Redis, Langfuse*

[GitHub](#) 

- Built a hybrid AI + rules support system where LLM assessments classify messy complaint semantics while deterministic policy code controls refunds, replacements, coupons, and escalations.
- Grounded responses in order, item, evidence, customer, and policy context with PostgreSQL/pgvector, Redis state, Langfuse traces, confidence thresholds, and regression checks.

Technical Skills

Languages: JavaScript, TypeScript, Python, Go, SQL

Frameworks: React, Next.js, Node.js, Express, FastAPI, Echo

Tools: PostgreSQL, Redis, RabbitMQ, Docker, GitHub Actions, Firebase Auth, Judge0, Prometheus
