Education

Dayananda Sagar College of Engineering

Bengaluru, India

B.E. Artificial Intelligence and Machine Learning

Experience

Bentham AI 

Dec 2025 – Feb 2026

Backend Engineering Intern: Node.js, JavaScript, Go, Docker, GCP, GitHub Actions

Remote

- Built and deployed Node.js automation services that combined backend APIs, browser automation, generated AI-assisted drafts, validation, and user-visible recovery states.
- Reduced manual workflow time by **85%** while keeping long-running automation steps recoverable through retries and session-state checks.
- Handled Docker packaging, Google Cloud Run deployment, and GitHub Actions release automation for faster iteration.

Google Summer of Code 

May 2025 – Sept 2025

Mentee at Invesalio: Python, VTK, wxPython, NumPy, PyTorch, ONNX

Remote

- Built Python features in a mature open-source codebase, integrating model inference, generated artifacts, performance-sensitive processing, and UI inspection paths.
- Cut processing runtime by **87%** using async/parallel execution over large input data.
- Adapted quickly across unfamiliar systems including VTK/wxPython UI code, NumPy data paths, and PyTorch/ONNX-style inference behavior.

Open Source

Contributions 

- Contributed reliability and systems patches across **Kuadrant MCP Gateway**, Kyverno, CRIU, VideoLAN, and Tiled, including backend-outage grace handling, parser robustness, and security-validation paths.

Projects

Seaweed: Contest Platform | *TypeScript, React, Next.js, Go, PostgreSQL, Judge0, Firebase, Docker*

GitHub 

- Built a production-style React/Next.js assessment platform with auth-gated problem pages, code editor, submissions, admin review, shortlisting, and live ranked leaderboards.
- Implemented Go judging APIs with Judge0, PostgreSQL rankings/materialized views, Redis-backed runtime state, and Docker/Kubernetes deployment for **500+ concurrent users**.

Penny Lane Capital | *Python, Agno, Pydantic, SQLite, Vector Memory, yfinance, JSONL*

GitHub 

- Built a multi-agent market-research workflow with analyst roles, bull/bear debate, trader, risk review, portfolio approval, typed Pydantic state, SQLite checkpoints, and replayable JSONL traces.
- Evaluated decisions with historical-market backtests, reward-loop style scorecards, validation harnesses, and baseline comparisons across return, drawdown, win-rate, and risk signals.

Postificus | *Go, Echo, Rod, PostgreSQL, Redis, RabbitMQ, Docker, Prometheus*

GitHub 

- Built browser-automation-backed product workflows with REST APIs, RabbitMQ workers, Redis autosave, PostgreSQL persistence, durable job status, and recoverable external publishing tasks.
- Added retries, DLQs, circuit-breaker isolation, health checks, and Prometheus metrics so long-running API/browser workflows stayed observable and fault-tolerant.

Technical Skills

Languages: JavaScript, TypeScript, Python, Go, SQL

Frameworks: React, Next.js, Node.js, Express, FastAPI, Echo, Agno

Tools: PostgreSQL, MongoDB, Redis, Docker, Git, GitHub Actions, GCP, OpenTelemetry, JSONL
