Education

Dayananda Sagar College of Engineering

Bengaluru, India

B.E. Artificial Intelligence and Machine Learning

Experience

Bentham AI 

Dec 2025 – Feb 2026

Backend Engineering Intern: Go, Node.js, Docker, GCP, Puppeteer, GitHub Actions

Remote

- Built a production workflow around **AI-assisted company-registration drafts**, operator validation, public-site API lookups, and automation handoff.
- Implemented resilient backend execution with retries, session recovery, browser automation, and state validation, reducing manual filing time by **85%**.
- Containerized services with Docker, deployed to Google Cloud Run, and automated releases through GitHub Actions, improving deployment velocity by **70%**.

Google Summer of Code 

May 2025 – Sept 2025

Mentee at Invesalious: Python, VTK, wxPython, NumPy, PyTorch, ONNX

Remote

- Built Python medical-image segmentation tooling for **95 brain subparts**, integrating preprocessing, model inference, generated masks, and product-visible inspection flows.
- Reduced segmentation runtime by **87%** using asynchronous and parallel execution while preserving output review workflows for generated masks and 3D surfaces.
- Debugged model-output regressions across conformation, orientation, label mapping, PyTorch/ONNX-style inference, and binary mask generation in a mature open-source codebase.

Open Source

[Contributions](#) 

- Contributed patches across Invesalious, IOOS, VideoLAN, CRIU, Tiled, Kyverno, and Kuadrant, working inside maintainer review processes for reliability, security, and integration quality.

Projects

Seaweed: Contest Platform | Go, TypeScript, React, Next.js, PostgreSQL, Judge0, Firebase

[GitHub](#) 

- Built an **end-to-end coding assessment product** with auth-gated problem pages, code editor, submissions, admin shortlisting, and live ranked leaderboards.
- Implemented Go judging APIs with Judge0, PostgreSQL rankings/materialized views, and Redis-backed runtime state for **500+ concurrent users** and **sub-5s P95 verdict latency**.

Postificus | Go, Echo, TypeScript, React, Vite, PostgreSQL, Redis, RabbitMQ

[GitHub](#) 

- Built a **publishing dashboard and editor workflow** with rich-text editing, autosave, platform/account controls, status views, and REST-backed publishing actions.
- Implemented workers with retries, DLQs, browser-automation fallbacks, health checks, and Prometheus metrics for unreliable third-party workflows.

Swish Support System | Python, Go, FastAPI, PostgreSQL, Redis, Langfuse

[GitHub](#) 

- Built an **AI-assisted support workflow** with complaint classification, policy-safe actions, session context, and a lightweight UI for multi-turn case testing.
- Added traceable assessments, response-quality checks, and regression tests to keep generated support actions grounded and reviewable.

Technical Skills

Languages: Python, Go, TypeScript, SQL

Frameworks: FastAPI, Gin, Echo, Node.js, React, Next.js, Vite, Tailwind CSS

Tools: PostgreSQL, Redis, RabbitMQ, Firebase Auth, Judge0, Docker, GCP, AWS, GitHub Actions, Prometheus, Langfuse
