Education

Dayananda Sagar College of Engineering

Bengaluru, India

B.E. Artificial Intelligence and Machine Learning

Experience

Bentham AI 

Dec 2025 – Feb 2026

Product Engineering Intern: Node.js, JavaScript, Go, Docker, GCP, GitHub Actions

Remote

- Containerized automation services with Docker, deployed on Google Cloud Run, and wired GitHub Actions releases for repeatable production updates.
- Built recoverable service execution around retries, state validation, session recovery, public-site API lookups, and operator-visible failure states.
- Improved deployment velocity by **70%** while reducing manual filing time by **85%** through backend workflow automation.

Google Summer of Code 

May 2025 – Sept 2025

Mentee at Invesalio: Python, VTK, wxPython, NumPy, PyTorch, ONNX

Remote

- Reduced runtime by **87%** using async/parallel execution over large medical-image processing paths in a mature Python application.
- Debugged production-style issues across Linux development environments, large files, NumPy/PyTorch-style workloads, generated artifacts, and UI integration.
- Adapted changes to existing project conventions while working through maintainer review and compatibility constraints.

Open Source

[Contributions](#) 

- Contributed maintainer-reviewed patches across **Kuadrant MCP Gateway** and **Kyverno**, plus CRIU, VideoLAN, Tiled, IOOS, and Invesalio, spanning backend integration behavior, parser robustness, security validation, and compatibility fixes.

Projects

Postificus | *Go, Echo, Rod, PostgreSQL, Redis, RabbitMQ, Docker, Prometheus*

[GitHub](#) 

- Built browser-automation-backed product workflows with REST APIs, RabbitMQ workers, Redis autosave, PostgreSQL persistence, durable job status, and recoverable publishing tasks.
- Added retries, DLQs, circuit-breaker isolation, health checks, and Prometheus metrics so long-running API/browser workflows stayed observable and fault-tolerant.

Seaweed: Contest Platform | *Go, TypeScript, React, PostgreSQL, Redis, Judge0, Docker, Kubernetes*

[GitHub](#) 

- Built product and platform paths for registration, submissions, sandboxed code execution, admin review, live rankings, and durable result records across contest traffic.
- Designed async verdict polling, PostgreSQL result schemas, Redis-backed runtime state, Docker/Kubernetes deployment, and **sub-5s P95 verdict latency**.

Hyoka | *Python, FastAPI, PostgreSQL, Next.js, TypeScript, OpenTelemetry, Docker*

- Built backend and dashboard paths for operating agent behavior, including trace ingestion, suites, candidates, validation runs, promotion state, audit history, and gate decisions.
- Designed project-scoped API keys, worker leases, signed manifests, JSON schema checks, replay artifacts, and containerized Postgres-backed services.

Technical Skills

Languages: Python, Go, TypeScript, SQL, Shell

Frameworks: FastAPI, Echo, Node.js, React, Next.js

Tools: Linux, Docker, Kubernetes, AWS, GCP, PostgreSQL, Redis, RabbitMQ, GitHub Actions, OpenTelemetry, Prometheus
