Education

Dayananda Sagar College of Engineering

Bengaluru, India

B.E. Artificial Intelligence and Machine Learning

Experience

Bentham AI 

Dec 2025 – Feb 2026

Product Engineering Intern: Node.js, JavaScript, Go, Docker, GCP, GitHub Actions

Remote

- Built resilient backend automation for high-friction public-site workflows with retries, session recovery, API lookups, state validation, and operator checkpoints.
- Reduced manual filing time by **85%** and kept generated workflow state inspectable before execution.
- Used Docker, Cloud Run, and GitHub Actions to keep releases repeatable and improve deployment velocity by **70%**.

Google Summer of Code 

May 2025 – Sept 2025

Mentee at Invesalius: Python, VTK, wxPython, NumPy, PyTorch, ONNX

Remote

- Built Python features inside a mature open-source application, integrating model outputs, generated artifacts, performance-sensitive processing, and UI inspection paths.
- Cut runtime by **87%** using async/parallel execution over large input data.
- Worked through integration issues across VTK/wxPython UI code, NumPy data paths, PyTorch/ONNX-style inference, and label mapping.

Open Source

[Contributions](#) 

- Contributed maintainer-reviewed patches across **Kuadrant MCP Gateway** and **Kyverno**, plus CRIU, VideoLAN, Tiled, IOOS, and Invesalius, spanning backend integration behavior, parser robustness, security validation, and compatibility fixes.

Projects

Seaweed: Contest Platform | *Go, TypeScript, React, PostgreSQL, Redis, Judge0, Docker, Kubernetes*

[GitHub](#) 

- Built product and platform paths for registration, submissions, sandboxed code execution, admin review, live rankings, and durable result records across contest traffic.
- Designed async verdict polling, PostgreSQL result schemas, Redis-backed runtime state, Docker/Kubernetes deployment, and **sub-5s P95 verdict latency**.

Postificus | *Go, Echo, Rod, PostgreSQL, Redis, RabbitMQ, Docker, Prometheus*

[GitHub](#) 

- Built browser-automation-backed product workflows with REST APIs, RabbitMQ workers, Redis autosave, PostgreSQL persistence, durable job status, and recoverable publishing tasks.
- Added retries, DLQs, circuit-breaker isolation, health checks, and Prometheus metrics so long-running API/browser workflows stayed observable and fault-tolerant.

Hyoka | *Python, FastAPI, PostgreSQL, Next.js, TypeScript, OpenTelemetry, Docker*

- Built backend and dashboard paths for operating agent behavior, including trace ingestion, suites, candidates, validation runs, promotion state, audit history, and gate decisions.
- Designed project-scoped API keys, worker leases, signed manifests, JSON schema checks, replay artifacts, and containerized Postgres-backed services.

Technical Skills

Languages: Go, Python, TypeScript, JavaScript, SQL

Frameworks: FastAPI, Echo, React, Next.js, Node.js, PyTorch

Tools: PostgreSQL, Redis, Docker, Kubernetes, AWS, GCP, GitHub Actions, OpenTelemetry, Prometheus, Judge0
